

Lecturer Name: Professor Peter Cheung (1081)

Survey Name: SOLE UG Autumn 2020

Circuits and Systems (ELEC50001)

Individual Lecturer Feedback (Professor Peter Cheung)

1) The lecturer explained the material well					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
29	3	1			
2) The lecturer generated interest and enthusiasm					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
33					
3) The lecturer was approachable					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
32	1				
4) Overall, I am satisfied with this lecturer					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
29	3				1

5) Please use this box to provide any additional constructive feedback to this lecturer:

- Amazing lecturer, probably the best one I have seen, actually caring for the students and answering all the emails promptly, even with many questions and in difficult times (except once). Never making students feel that their questions are not valid, always excited, with humour and a positive attitude, encouraging students to do their best! I was very grateful for meeting him!
- Lecturer was knowledgeable and insightful. Thank you Prof Cheung!
- Professor Cheung is easily the most approachable member of staff that I have encountered in the department. It is clear that he truly cares about his students and for that I am extremely grateful. He is also a great lecturer and I have learnt more from him than any other member of staff this term
- Sometimes, he'd get so enthusiastic about how this topic came to be that he'd forget to explain the topic at hand.
- Professor Peter is an excellent lecturer. He is passionate and always providing meaningful chances to expand our knowledge.
- Hands down the most approachable and enthusiastic lecturer I have met this far in my time at imperial.
- Kindest lecturer to date
- Very good contact with the lecturer. I really appreciate that he made sure to adjust the pace to students' needs. I liked that we were asked about our progress in the lab in every class as I have difficulty admitting that I'm behind if not asked directly.
- I am very satisfied, everything was well explained. Many things that were in the problem sheets were not explained in the lectures which made it impossible for me to solve, but after looking at the solutions, most times I was able to understand (and even if i wasn't there was help available during the problem classes).
- Very responsible, always answer our questions in a very detailed way. Always think for the students.
- Sometimes there are too many examples explained in too short time.

Immediately below are the collated numerical results received for the Module.

Module Feedback - Circuits and Systems (ELEC50001)

1) The content of the module is well structured					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
21	10		2		
2) The content of the module is intellectually stimulating					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
28	5				
3) Where applicable, I have received helpful feedback on my work submitted so far					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
21	7	4		1	
4) Overall, I am satisfied with the quality of the module					
Definitely Agree	Mostly Agree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree	Not applicable
22	10	1

5) Please use this box to provide any additional constructive feedback on this module. Students with a disability are invited to make specific suggestions for improvement that would assist them:

- This course has been my favourite this term. The professor has adapted remarkably to online learning, and I feel as if I have learnt the most from this module, compared to other modules. It is the correct difficulty, and the way it is assessed is extremely well thought through. The only thing I have found disappointing is that in some lab sessions I have had to wait up to an hour for a GTA to become free and offer assistance, which really is not ideal.
- Make lab orals more forgiving, I don't deal well with face to face questioning regardless of how prepared I am with logbooks. Makes me feel cheated with grades.
- Please give more detailed marking scheme on grading criterias, eg. model answer.
- An amazing module, definitely the highlight of the term. Intellectually stimulating labs with a nice approach in lectures. Only criticism is that some of the lectures were too slow, while others were far too fast! Also, piazza would have been a far far better discussion forum compared to teams.
- The structuring is hard to follow, some examples are not explained correctly.
- Solutions to the first problem sheet could have been provided a little sooner; By the time I reflected on my work, I had forgotten what I had originally done
- Best module for this term. The labs and the lectures went together which was very helpful. Everything was well explained. The labs where probably the best structured and best explained labs we have done so far. They were at the right level of difficulty, while being very interesting at the same time!
- Module was challenging and insightful. Excellent.
- Lab sessions were more challenging to do remotely. The lab instructions could be a bit more detailed to help with the lack of face-to-face contact in the lab. I was barely able to keep up with the lab material, I would prefer fewer tasks so that I could focus better on them.
- Excellent organization + very good consideration of the students and their needs.
- The lab work takes a lot of time to complete. Although the lab logbook is helpful to keep record of our results, the time taken to arrange the info (inserting pictures, tables, graphs) as well as answering all the questions in the lab, is not small and should be taken into consideration when assessed. During interviews, we are assessed by how much further we have explored but how well the lab questions are answered is rarely checked. I find this quite unfair when a lot of effort was put into answering them. But I do recognize it depends on the interviewer, so a more standardized interview method should be done for fairness.
- It would be very much appreciated if there were true lectures available, similar to the ones in Electromagnetism.
- Lab orals were not a 100% fair in my opinion as different interviewers have different questions so the test wasn't uniform/standardized. Furthermore, some interviewers gave unfair grades (based on similar boxes tick for different students) and it shows that the orals is relatively unfair for the grade to be decided by just one person. It somewhat made this lab oral based on luck depending on the interviewer that you get and the questions you got asked. But overall, the structure of the lab and the course was great so keep up the good work Peter!
- Everything is perfect for this module, I deeply enjoyed it.
- Tha pace of the module is A bit too fast. However prof Peter Cheung is a brilliant person and teacher
- Great module and lecturer, I would say it's my favourite module in the autumn term.
